

Don't know where to start?

Discover & prioritise your AI opportunities

FOUR WEEKS

FIXED PRICE

FROM £2,995 + GST

Our **AI Opportunities Assessment** is where we get to know your business properly: how it runs, where time is lost, and where AI and automation will create real operational value.

WHO IT'S FOR

Established Jersey businesses, typically with 25 to 100 people, where manual processes are genuinely costing time and money but where hiring a dedicated AI lead doesn't yet make sense.

You believe AI can help you become more efficient, but you're not sure where to start.

How it works

A structured four-week process

01 Discover

We review your operations with your management team to identify automation candidates, then map contender processes in detail to establish a baseline.

02 Analyse

We quantify potential savings by evaluating manual effort against predicted AI-driven efficiencies to determine where automation adds the most value.

03 Prioritise

We develop solution frameworks and costings, calculating the projected ROI for each opportunity to rank them by impact and delivery potential.

04 Present

We present our findings to your leadership team, providing a structured roadmap and a recommended first move.

What you'll get

The knowledge to move forward

✦ Your biggest 3 to 5 opportunities, mapped

✦ Each opportunity costed and ranked by return

✦ A 12-month roadmap you can take to the board

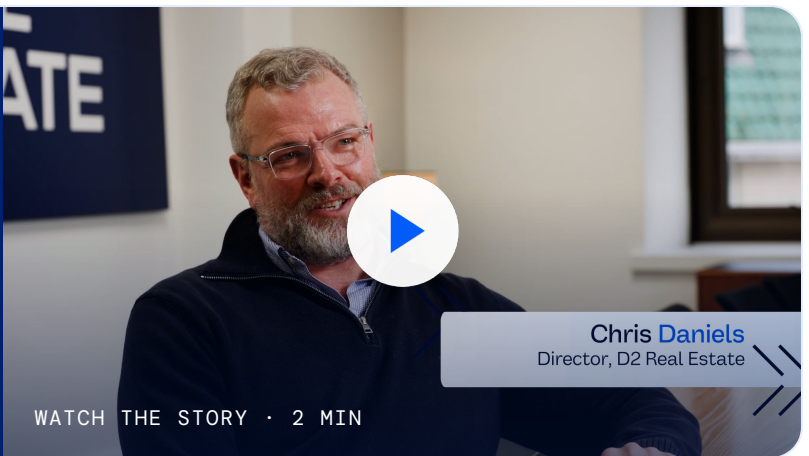

✦ A presentation of our findings and supporting documents

PROVEN RESULTS

1,300+

hours saved per year

Where it leads

A more optimised organisation

This is a standalone piece of work that gives you a roadmap and a suggested approach for embedding AI into your organisation. You can take it forward with Blue Llama to implement the suggestions, or work with another provider — the choice is yours.

Let's talk.

Tell us where time disappears in your business and we'll show you where AI can help.
